SUMMARY

A passionate web developer mainly focusing on the backend. Changing careers from a cook, pursuing my curiosity from school days, and getting fully drawn in the programming world. Looking to obtain a full-time job developing, maintaining, and or designing web pages. Aiming to learn new skills and improve current ones.

SKILLS

Backend – Python, Django, Django REST framework, PostgreSQL.

Frontend – Javascript, React, Redux, HTML, CSS, Sass.

Tools – Git, AWS, Docker.

Personal Projects

Ecommerce website (pepacom.herokuapp.com)

- Created an API using Django REST framework to connect with the frontend.
- Designed the frontend to efficiently and effectively display consumed information.
- Developed the backend payment functionality, user authentication, and Google authentication using Google API.
- Deployed database and static files to AWS.

Blog website (aron-blog-app.herokuapp.com)

- Developed the backend with CRUD functionality and user authentication using Django.
- Designed the frontend using bootstrap and javascript.
- Deployed the database and static files to AWS.

Certification

AWS Certified Cloud Practitioner

- Obtained an understanding of cloud computing.
- Learned the fundamentals of AWS technologies.

Education

Kaunas Food Industry and Trade Training Center	Professional education	2017-2019
Kaunas Juozas Grušas Art Gymnasium	Secondary education	2010-2017

Work Experience

UAB Nuogas – Cook <ul style="list-style-type: none">• Learned how to work in a team.	2018/September – 2019/December 2020/May – 2021/May
UAB Momo Grill – Cook <ul style="list-style-type: none">• Learned how important quality is.	2019/December – 2020/April
